George Street Sewer Improvements
Project 16-1S
City of Marion, Ohio
December 11, 2015

ADDENDUM NO. 1

The foregoing Addendum No. 1 acknowledges and/or changes the RFP specifications as follows only to the extent indicated, and in no way alters the remaining details.

- The limits of construction for this project will also include replacing the sewers in Hamilton Alley, from George St. to Farming St., and repaving the alley. This is the first alley west of Jefferson St.
- Due to George St. having only a 50' right-of-way, the roadway will be widened (if necessary) to a minimum of **24 feet** (edge of pavement to edge of pavement) and curbing will be added.
- Approximately 400 LF of 20" Storm Sewer will be lined using a CIPP application. This storm line runs from the west side of Jefferson St. eastward down the vacated portion of George St. to a manhole. It is beyond the limits of the full depth reconstruction for this project.
